

Cochlear™ Lend an Ear program

Early access to sound can make all the difference for your child.

The Cochlear™ Lend an Ear program was created for children 12 and under who need early access to sound through a bone conduction solution*. Our unique program provides your child with an appropriately-fit Baha® 6 Max Sound Processor while the insurance approval process takes place. This means that your child can have access to critical sounds as early as possible to help them hear, learn and develop essential communication skills.

Learning to communicate begins early—well before your child says their first word—which is why it's so important for children with hearing loss to be given access to sound sooner rather than later. It can help lay the foundation for fundamental language and social skills to help them be successful in school and society later in life. In fact, research shows children whose hearing loss is identified and treated early are better able to develop speech, language, cognitive and social skills ahead of later identified children.¹

* Lend an Ear program is offered in the United States only.

Why choose the Cochlear Lend an Ear program

- Provides your child with early access to sound, prior to obtaining insurance authorization.
- For your convenience, once your child receives their Baha 6 Max Sound Processor and Softband or SoundArc™, there may not be a need for exchange or additional trips to the audiologist; the technology is theirs to keep.
- Our Baha 6 Max Sound Processor is designed for those with a hearing loss up to 55 dB SNHL* and features our most advanced sound processing technology and direct streaming with a compatible smartphone.**
- We offer two non-surgical options for children—the Baha Softband and Baha SoundArc—that are easy to use and compatible with the Baha 6 Max Sound Processors. Both non-surgical solutions will work with one or two sound processors, depending on your child's needs.
- Cochlear offers direct billing and reimbursement assistance with insurance plans that can help make the approval and payment process easier, including appeals for coverage.
