KANSO

Kanso™ is an off-the-ear sound processor that's so discreet it's barely noticeable, so small and comfortable you can forget you're wearing it.

This offers greater confidence that you can live your life your way.

Kanso does this without compromising on hearing performance technology. Kanso incorporates the same industry-leading features as the Cochlear™ Nucleus® 6 Sound Processor, making it even easier for you to find the joy of hearing.
